Reasons for Allowance

1. An examiner's amendment to the record appears below. This was made to cancel out claim 16 and amend claims 1 and 6. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Please rewrite claim 1 as follows:

A method of integrating a third party device into a building control system, the building control system having a workstation running building control system program instructions and a separately housed field panel in communication with the workstation, the method comprising the steps of:

providing a user interface separate from the field panel for the input of data regarding a third party building control device that is on the field panel, wherein said third party building control device is one of the group consisting of a sensor or actuator or actuator controller, in an environmental and fire safety system;

accepting data input from the user regarding the third party building control device through the user interface;

launching an integration tool in response to the data input from the user regarding the third party building control device;

generating an integration file by the launched integration tool for use by a driver at the field panel associated with the third party building control device; and

loading the generated integration file into the separately housed field panel for use by the driver associated with the third party building control device to allow the third party building control device to operate in conjunction with the building control system software.

Please rewrite claim 6 as follows:

. A building control system comprising:

a workstation running building control system software;

a field panel in electronic communication with, and separately housed from, said workstation via a network; and

a software integration tool configured to generate a database that will run in conjunction with said building control system software and to aid in integrating a third party building control device into the building control system, said software integration tool operative to a) provide a user interface separate from the field panel for the input of data regarding a third party building control device that is on the field panel, wherein said third party building control device is one of the group consisting of a sensor or actuator or actuator controller, in an environmental and fire safety system, b) accept data input from the user regarding the third party building control device through the user interface, c) launch an application builder in response to the data input from the user regarding the third party building control device, d) generate an application file by the launched application builder for use by a driver associated with the third party building control device, and e) load the generated application file into the field panel for use by the driver associated with the third party building control device.

Please cancel claim 16

3. Authorization for this examiner's amendment was given in a telephone interview with Mr. Harold Moore on 9/19/08.

4. The following is an examiner's statement of reasons for allowance: The Examiner's amendment places the application into condition for allowance by cancelling the broad claim 16 and amending claims 1 and 6 to fully bring out the details of the third party building control device, as well as the third party building control device being on the field panel, as well as the separate interface. The features all combined in the amended independent claims (1 - method, 6 - system) are not set forth in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven P. Sax whose telephone number is (571) 272-4072. The examiner can normally be reached on Monday thru Friday, 8:30 AM - 5:00 PM.
